## PharmLabs San Diego Certificate of Analysis

3421 Hancock St, Second Floor, San Diego, CA 92110 | License: C8-0000098-LIC ISO/IEC 17025:2017 Accredited L17-427-1 #85368

## sample Trap Trees Snow Cone 3.5g Disposables

Sample ID SD230817-040 (82878) Matrix Concentrate (Inhalable Cannabis Good) Tested for Top Shelf Hemp Co Sampled -Reported Aug 17, 2023

Received Aug 16, 2023 Analyses executed CANX, QARUSH

Laboratory note: The estimated concentration of the unknown peak in the sample is 3.89% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)8-THC or 49-THC. At this time there are no reference standards available for (+)48-THC (+)48-THC (+)48-THC is a different compound from the main (-)48-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)48-THC and 49-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)48-THC with the majority, if not all, of the concentration being (+)48-THC. Total (+/-) D8 Concentration is estimated to be: 69:98%

Unit Mass (g) 3.5

## CANX - Cannabinoids Analysis

Analyzed Aug 17, 2023 | Instrument HPLC-VWD | Method The expanded Uncertainty of the Cannabinoid analysis is approximately **3**.806% at the 95% Confidence Level

Analyte	LOD mg/g	LOQ mg/g	Result %	Result mg/g	Result mg/Unit
